DETAILED ACTION

1. Applicant's election without traverse of group I, claims 1-11 in the reply filed on November 02, 05 is acknowledged.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-10 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Lee (6,743,368).

Lee teaches a nano-size imprinting stamper, comprising a transparent base (11) and a plurality of micro-features, or necks (21), distal ends (27) and spacers (23), and wherein the base comprises glass (col. 7, lines 16-35), wherein the micro-features, the distal ends, and the spacers are made of different material and are different from each other. These material can be light-transparent such as silicon oxide, polysilicone, etc. or non-light transparent such as a metal (col. 6, lines 55-63) and wherein the metal can be aluminum oxide (col. 3, Table 3).
